2013-Current:

Freelance Web Developer

- PMJ Groundworks (defunct)
- Examplar (Exam Paper Search Tool)
- Project X (Work in progress)

Personal Statement:

Availability: I can be available to start work as soon as required and I am able to work extra hours so long as this does not conflict with current commitments at university. Therefore, I would find employment preferable if provided with flexibility to fit around my current studies at the University of Brighton.

Leisure Interests: My leisure and recreational interests include web development, music, politics and sciences. For the most part this includes making web applications for fun, playing guitar. It is for this reason I decided to take my education further and study areas of computer science further at Brighton University, I volunteer in the IT Faculty of Bexhill College. To back this further I have previously had work experience at the Grove College as a Teaching Assistant where I assisted in the preparation, teaching and covering of lessons spanning English, the sciences, religious education and music. I enjoy a range of other activities predominantly learning, reading and live musical performances (attending and playing). This is why I decided to make the most of my opportunities at Bexhill College where I have studied four subjects and voluntarily assisted in the maintenance of the IT department resources resulting in me and why I was invited back to assist in the teaching and running of student support sessions. Due to this, I have consistently maintained a hunger and drive to learn new things especially within the fields of IT and the sciences, all of which I consider instrumental to success and important aspects to life and my development.

Personal Statement: I am a polite, well-mannered person who is keen to learn new skills and adapt to new environments. I am sociable, hardworking and determined with my work. My ideal employment would be to work within an IT based environment. However, I am happy to adapt to any environment required. I am aspirational and keen to work my way up within a business. Throughout my entire academic career I have strived to maintain a high-level of quality in my work, punctuality and my attendance, which has consistently been 100% up until my final year in college, something I know can only be an asset to any employer.
